
MODEL UNITED NATIONS

15 May, 2024

By Anjela Mirzoiani

This year conference was held in the purpose of tackling the issue of overproduction and sustainable production by using better ways which will help decrease the waste created by over consumption.

It is the main purpose of ODD 12 - Establish sustainable consumption and a better production pattern. Even if the United States couldn't attend the meeting due to transport complications all the other countries that were present came to an agreement on the fact that over consumption was an issue that had to be dealt with immediately.

Some countries even had the courage to openly stand against Russia like Denmark and Finland. This move was bold but their courage was appreciated. Russia didn't seem to appreciate it as much since they got escorted out of the conference room and excluded from voting due to the fact that the other countries thought that Russia was being too threatening .

Great ideas came out of this meeting such as the pooling of knowledge from universities and public and private research institutions to help the countries that lack in knowledge in specific areas to improve , but this will be done only by countries that volunteer on sharing their knowledge . The decision of stopping the aesthetic selection of fruits was also opted for to stop wasting perfectly edible food over some fruit beauty standards.
